

## Arizona Silver Belt. THE ELECTION!

Thursday, November 7, 1878.

### GLOBE DISTRICT.

#### Developments and General Mining News for the Week.

The outlook of the McMillen lode at the present time is certainly brilliant.

The Stonewall Jackson, in their main shaft, at a depth of 170 feet, have struck a 4-foot vein of \$2,000 ore. The ore is chloride, silver glance, native silver and sulphurite.

The Julius and Chloride mines are included in the purchase made by A. C. Hasey & Buck. Mr. H. left for Chicago last Monday to make arrangements for developing this property.

Mr. P. McGorrish returned to Globe this week from the Dragon and Chiricahua mountains. He reports some good mines in that section, but the country is not thoroughly prospected.

The main working shaft of the Hannibal is down 160 feet. The cross cut from that level to the footwall, at which all the rich ore of the McMillen ore is found, is expected to show up well.

We learn that a good body of ore has been struck in the Gorman shaft, on the north end of the Hannibal mine, at a depth of 100 feet. Its extent has not yet been determined, but so far as prospected it looks most encouraging. The ore is silver glance and assays \$1,000 per ton.

The Stonewall S. M. Co. have, at the depth of 30 feet, struck a vein in the Florence mine of one foot in width. The mine was regarded as valueless and no attention paid to it until now. It is a distinct lode from the Stonewall. The supposition is that the Company will now develop it.

Haye & Buck are about shipping some of their finest silver ore to San Francisco, and judging from what we hear of it and specimens that we have seen, it will produce returns that would make the eyes of a Comstocker or Bodie man stick out. They are also about to ship some to the mill formerly run by Mr. Tidwell, where it will be worked by Fred Medier. The ore in both cases is from the Julius and Chloride mines.

We understand that A. C. Hasing, of Chicago, intends to introduce the lixiviation process, now so generally adopted in Europe and elsewhere, for the reduction of ores, and we predict for him a success. More than that, we predict for Globe and its miners some show to stay above water, when low grade ores are worked at such a price as to give a living profit and a fair deal. Thanks to Mr. Hasing and his enterprise, such a consummation seems near at hand.

The tops of the Sierra Anchas, Pinon, and White mountains are covered with snow, and are as white as a snow-white ram.

"Now stir the fire, and close the shutters fast;  
Let fall the curtains, wheel the sofa 'round;  
And while the bubbling and loud-hissing urn  
Throws up a steamy column, and the cups,  
That cheer but not inebriate, wait on each,  
So let us welcome blustering winter in."

Charley Shannon says the White mountains are always white as a white ram, and that our reference to their winter clothing is bosh. Charley may know all about the appearance of the White mountains, but is not always reliable when speaking of majorities of his favorite candidates before election. He is enthusiastic in their behalf, and not unfrequently piles majorities higher than the list of registered voters.

"The snow, the beautiful snow," etc.

And by the time it flies in the valleys we will have our buffalo robes, via Lacy's Express from New Mexico, and consequently will care very little whether or not the winds are tempered to the shorn lamb. We are a lamb in the raw pasture.

The influx of strangers to this district is constantly increasing. The completion of the railroad to Maricopa Wells will bring a flood of people from the Atlantic and Pacific States. Orders have been received at Yuma to prepare for the receipt of 10,000 tons of rails. The Sentinel says enough for 125 miles of road.

Morrill, Barton, Westmore, and a resident of Georgetown left Tuesday for Silver City by Lacy's Express.

Maj. Lawrence G. Murphy, late of Lincoln county, N. M., died in Santa Fe, on the 20th ult.
